Aeronautical Engineering DARE — S88

Take Your Passion to New Heights where Sky is Not the Limits

Discover a thrilling runway to your dreams with our Diploma in Aeronautical Engineering (DARE). Since its launch in 2002, SP has remained a trailblazer in aeronautical engineering education, making DARE one of Singapore's most comprehensive and versatile aerospace course.

Accredited by the Skills Framework for the Air Transport and Aerospace Sector, this program ensures that you graduate with the most up-to-date skills.

You'll have the opportunity to be trained by industry practitioners from ST Engineering Aerospace and/or Singapore Airlines Engineering Company.

Through a design thinking approach, you will foster problem-solving and creativity through hands-on learning.

For those aspiring to become an aircraft pilot or a CAAS-certified drone pilot, there are opportunities to take additional courses to pursue your passion.

Picture yourself in our awe-inspiring Aerohub, a SAR147 accredited training facility and training playground for aspiring aviation professionals. Step into this state-of-the-art facility that spans a jaw-dropping 4,660 square metres and discover four aircrafts, along with two full-motion simulators. Brace yourself for a hyper-realistic experience that is as close as it gets to a real-world industry setting.

To truly excel in your field, you'll need industry connections and real-world experience. That's why we've partnered with aerospace organisations such as:

- Singapore Technologies Engineering Aerospace
- The Republic of Singapore Air Force
- SIA Engineering Company
- JAMCO Aero Design & Engineering Pte Ltd

If you're ready to mount new heights, DARE is your gateway to an eye-opening adventure in the aerospace industry.

WHAT YOU CAN EXPECT

- Pursue a Private Pilot License (PPL) at the Singapore Youth Flying Club (SYFC).
- Participate in local and overseas competitions such as the Singapore Amazing Flying Machine Competition (SAFMC).
- Explore different cultures during the overseas exchange programme.
- Enjoy advanced standing in local and international universities.
- The DARE curriculum prepares you for the CAAS Airworthiness Requirements (SAR 66) exams.
- Look forward to attractive career opportunities in the aerospace industry.
- Complement your domain modules with emerging digital skills.

DARE ELECTIVE TRACKS

Furthering
Aero Design and Manufacturing
Aerospace Emerging Technology

Broadening
Aviation Management

Deepening
Aircraft Maintenance and Composite Repair

FURTHER STUDIES

You can gain an advanced standing of up to two years in Mechanical Engineering and other relevant degree courses at local and international universities, such as:

- Nanyang Technological University (NTU)
- National University of Singapore (NUS)
- Singapore University of Technology & Design (SUTD)
- Singapore University of Social Sciences (SUSS)
- Imperial College London
- Embry-Riddle Aeronautical University, USA
- University of New South Wales (UNSW)
- Adelaide University

ENTRY REQUIREMENTS

Range of Net 2026 JAE ELR2B2: 5 – 13
Aggregate Type: ELR2B2-C

SUBJECT	GRADE
English Language	1 – 7
Mathematics (Elementary/Additional)	1 – 6
Any one of the following subjects: • Biology • Biotechnology • Chemistry • Computing/Computer Studies • Design & Technology • Electronics/Fundamentals of Electronics • Physics • Science (Chemistry, Biology) • Science (Physics, Biology) • Science (Physics, Chemistry)	1 – 6

Applicants should not be suffering from severe vision deficiency (including colour vision), acute hearing impairment or uncontrolled epilepsy. Interested applicants with any of these conditions are advised to contact Singapore Polytechnic for more information.

CAREER OPTIONS

- Aeronautical Engineering Technologist
- Assistant Aeronautical Design & System Engineer
- Assistant Aerospace Sales & Marketing Engineer
- Assistant Aerospace Systems Quality Assurance Engineer
- Assistant Engineering Service Engineer
- Assistant Mechanical Engineer
- Assistant Simulator Systems Engineer
- Assistant Technical Service Engineer
- Assistant Unmanned Vehicle System Design Engineer
- Flight Operations Officer
- Licensed Aircraft Maintenance Engineer
- Aircraft Maintenance Planning Executive

Looking back, my time in SP was nothing short of enriching, I was able to learn what I love together with and from the people who had the same passion as me. Through this, I was able to discuss the best practices in the theoretical work and practical we took part in. On top of this, I was able to develop into an engineer that was able collaboratively work with others through my internship and projects.

Adrian Chan Siang Ji
PSC Scholarship Recipient

WHAT YOU'LL STUDY

Diploma in Aeronautical Engineering

FIRST YEAR

- Basic Mathematics
- Common Core Modules
- Computer Programming
- Computer Aided Drafting
- Digital Electronics Fundamentals
- Engineering Materials 1
- Engineering Mathematics 1
- Introduction to Engineering
- Mechanics 1
- Fundamentals of Electrical & Electronic Engineering
- Thermofluids 1

SECOND YEAR

- Aircraft Maintenance Practices
- Aircraft Structures
- Common Core Modules
- Computer-Aided Design (Aeronautical)
- Elective 1
- Elective 2
- Engineering Materials 2
- Engineering Mathematics 2
- Fundamentals of Flight
- Mechanics 2
- Statistics & Analytics for Engineers
- Thermofluids 2

THIRD YEAR

- Aircraft Electrical & Avionics Systems
- Aircraft Power Plants
- Aircraft Systems
- Elective 3
- Air Legislation & Human Factors
- Mechanics 3
- 22 weeks Internship Programme/Internship Equivalent

ELECTIVES

The SP elective framework offers students options to pursue their passion and / or meet different career needs, and is an integral part of the holistic education we seek to provide to our students. The learning experiences of this elective framework help students in their development as self-directed, versatile, life-long learners, which are essential in today's volatile and changing societal as well as occupational landscape.

Most students will take three electives during their time in SP. Students who are interested to explore additional new skills and abilities will have the opportunity to take up to five electives. Certificates and minors will be awarded when students complete a suite of related elective modules.

COMMON CORE CURRICULUM

The Common Core Curriculum (CCC) prepares you for a future shaped by AI, rapid change, and real-world challenges. Across seven modules, you will build AI and digital skills, while developing critical human skills such as teamwork, critical thinking, creativity, and communication. These skills will help you stand out at the workplace and in life.

You will also engage with challenges that matter to Singapore, ASEAN, and the world through the Sustainable Development Goals (SDGs), gain a deeper understanding of how they affect different communities, and discover how you can contribute to a more sustainable future.

All full-time diploma students are required to take a compulsory Education and Career Guidance module in SP. Students will take Education and Career Guidance — Personal Development (30 hours) in their first year.

All students are required to take the compulsory Wellness for Life (WFL) module during their first year at SP. Students must pass the module as part of the graduation criteria.

Aerospace Electronics

DASE — S90

Designing the Marvels of Aerospace

Come aboard the world of aerospace with the Diploma in Aerospace Electronics (DASE) and discover the cutting-edge technology powering modern aircrafts such as the Airbus A350, Boeing 777 and fighter jets.

At DASE, you'll develop skills in flight management, instrumentation, navigation and more, placing you at the forefront of advancements in the aerospace industry. With a comprehensive curriculum endorsed by the Civil Aviation Authority of Singapore (CAAS), you'll gain future-ready skills to align with industry advancements.

Dive into the exciting world of **Aerospace Engineering (Avionics)** and **Information & Communication Technology (ICT) in Emerging Technologies** through hands-on experiences and industry partnerships. Internship opportunities await at prestigious companies such as:

- Airbus
- Rolls-Royce
- SIA Engineering Company

Pursue your aviation dreams here! Obtain a **Private Pilot License (PPL)** at the Singapore Youth Flying Club (SYFC) and immerse yourself in the complexities of **Commercial Pilot Theory** to gain a competitive edge. If you're captivated by drones, add a CAAS **Unmanned Aircraft Pilot License (UAPL)** to your repertoire.

Our 4,660-square-metre Aerohub is a training playground for aviation enthusiasts. This state-of-the-art facility boasts four aircrafts **and two full-motion simulators,** providing a hyper-realistic experience that is as close as it gets to the real deal.

As the official training partner for ST Engineering Aerospace, we equip you with the most in-demand skills in the aerospace industry, opening the door to a multitude of exciting career prospects.

WHAT YOU CAN EXPECT

- Gain expertise in specialised areas with a Certificate in Commercial Pilot Theory & Simulation or Aviation Management and Unmanned Aerial Vehicle (UAV) flying and drone technologies elective to enhance your career prospects.
- Acquire valuable industry experience through the 22-week overseas or local internship at reputable aerospace companies such as Airbus, Rolls-Royce, SIAEC, ST Engineering Aerospace, Thales, CAAS and Changi Airport Group.
- Join the SP-NUS University Accelerated Pathway Programme (UAPP) or SP-SUTD University Accelerated Pathway Programme to get a head start in university life.

SCHOLARSHIPS

- A*STAR Science Award
- DSTA Polytechnic Digital/Engineering Scholarship
- Home Team Diploma Sponsorship
- SAF Polytechnic Sponsorship
- SP Engineering Scholarship

FURTHER STUDIES

You can **gain an advanced standing of up to two years** of exemption in Aerospace Engineering, Electrical & Electronic Engineering or Computer Engineering degree courses in local and overseas universities such as NUS, NTU, SUTD, SIT, SUSS, Embry-Riddle Aeronautical University (USA), Imperial College (UK) and University of Edinburgh (UK).

ENTRY REQUIREMENTS

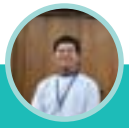

Range of Net 2026 JAE ELR2B2: 4 – 13
Aggregate Type: ELR2B2-C

SUBJECT	GRADE
English Language	1 – 7
Mathematics (Elementary/Additional)	1 – 6
Any one of the following subjects: • Biology • Biotechnology • Chemistry • Computing/Computer Studies • Design & Technology • Electronics/Fundamentals of Electronics • Physics • Science (Chemistry, Biology) • Science (Physics, Biology) • Science (Physics, Chemistry)	1 – 6

Applicants should not be suffering from severe vision deficiency (including colour vision), acute hearing impairment or uncontrolled epilepsy. Interested applicants with any of these conditions are advised to contact Singapore Polytechnic for more information.

CAREER OPTIONS

- Air Force Engineer (Under SP-RSAF Work-based Training Collaboration)
- Licensed Aircraft Engineer
- Electrical Engineer
- Electronics Engineer
- Engineering Service Engineer
- Aerospace Sales and Marketing Engineer
- Technical Service Engineer
- Flight Operations Officer

Since secondary school, I've been passionate about aircraft and electronics. SP's Aerospace Electronics diploma provided in-depth curriculum taught by industry-experienced lecturers using state-of-the-art facilities like the A320 simulator. I gained valuable knowledge and programming skills, applied during my DSTA internship. The flexible timetable allowed me to pursue hobbies and community service. SP built a strong foundation for my next chapter at University of Edinburgh!

Hansen Wee

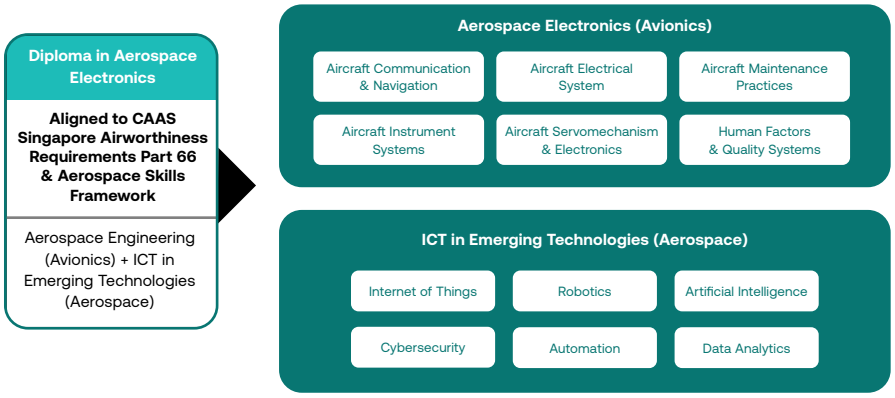

DASE alumnus

Public Service Commission (PSC) Engineering Scholar

SP Engineering Scholar

DSTA Polytechnic Engineering Scholar

Internship at Defence Science and Technology Agency (DSTA)

WHAT YOU'LL STUDY

Diploma in Aerospace Electronics

FIRST YEAR

- Basic Mathematics
- Common Core Modules
- Computer-Aided Design & Drafting
- Digital Electronics 1
- Digital Electronics 2
- Engineering Mathematics I
- Introduction to Engineering & Design
- Introduction to Engineering Programming
- Network Fundamentals
- Principles of Electrical & Electronic Engineering I
- Principles of Electrical & Electronic Engineering II

SECOND YEAR

- Aeronautical Engineering Science
- Artificial Intelligence & Data Analytics in Aerospace
- Aircraft Servomechanisms & Electronics
- Circuit Theory & Analysis
- Common Core Modules
- Elective 1
- Elective 2
- Engineering Mathematics II
- Human Factors & Quality Systems
- Internet of Things & Cybersecurity for Aerospace
- Robotics & Automation in Aerospace
- Statistics & Analytics for Engineers

THIRD YEAR

- Aircraft Communication & Navigation Systems
- Aircraft Electrical Systems
- Aircraft Instrument Systems
- Aircraft Maintenance Practices
- Elective 3
- Elective 4 (Option)
- Elective 5 (Option)
- 22-Week Internship Programme/ Internship Equivalent

The SP elective framework offers students options to pursue their passion and / or meet different career needs, and is an integral part of the holistic education we seek to provide to our students. The learning experiences of this elective framework help students in their development as self-directed, versatile, life-long learn ers, which are essential in today's volatile and changing societal as well as occupational landscape.

Most students will take three electives during their time in SP. Students who are interested to explore additional new skills and abilities will have the opportunity to take up to five electives. Certificates and minors will be awarded when students complete a suite of related elective modules.

COMMON CORE CURRICULUM

The Common Core Curriculum (CCC) prepares you for a future shaped by AI, rapid change, and real-world challenges. Across seven modules, you will build AI and digital skills, while developing critical human skills such as teamwork, critical thinking, creativity, and communication. These skills will help you stand out at the workplace and in life.

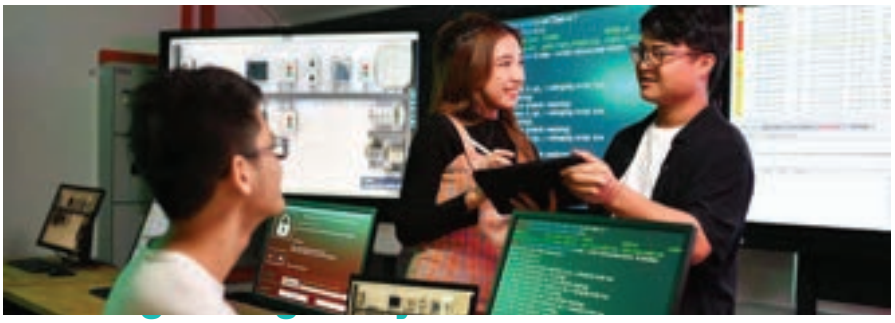

You will also engage with challenges that matter to Singapore, ASEAN, and the world through the Sustainable Development Goals (SDGs), gain a deeper understanding of how they affect different communities, and discover how you can contribute to a more sustainable future.

All full-time diploma students are required to take a compulsory Education and Career Guidance module in SP. Students will take Education and Career Guidance — Personal Development (30 hours) in their first year.

All students are required to take the compulsory Wellness for Life (WFL) module during their first year at SP. Students must pass the module as part of the graduation criteria.

Computer Engineering

DCPE — S53

Enter the thrilling world of computers, where intelligent systems shape our future. In a rapidly changing world, the Diploma in Computer Engineering (DCPE) offers a comprehensive and flexible curriculum so that you can keep your career and study options wide open.

As we propel towards a future where autonomous vehicles, drones, and intelligent city management systems play a vital role, it's crucial to stay ahead in areas like Artificial Intelligence of Things (AIoT), data analytics, 5G, networking, and cybersecurity. DCPE allows you to harness these cutting-edge capabilities, empowering you to shape the future and create innovative solutions for a "Smart Nation" like Singapore.

SCHOLARSHIPS

- A*STAR Science Award
- CSIT Diploma Scholarship
- DSTA Polytechnic Digital/Engineering Scholarship
- Home Team Diploma Sponsorship
- SAF Polytechnic Sponsorship
- SP Engineering Scholarship

CAREER OPTIONS

- AI Infrastructure Engineer
- Cloud Engineer
- Cyber Security Engineer
- DevOps Engineer
- Forward Deployed Engineer
- IoT/Embedded Engineer
- Network Security Engineer
- Software Engineer
- Systems Engineer

WHAT YOU CAN EXPECT

- Immerse in a **comprehensive curriculum** and master future-forward skills in Embedded Systems, Software, 5G Technology, Artificial Intelligence, Internet of Things, Cloud Computing, Networking and Cyber Security.
- Pursue your passion through electives that can lead to a **certificate or minor**.
- Gain exposure through a 6-week Overseas Immersion Programme to Japan.
- Join the **University Accelerated Pathway Programme (UAPP)** with NUS, NTU, SUTD, or SIT.

FURTHER STUDIES

There are more than 14 degree programmes from local universities in Computer Science/ Engineering, Information Systems, Data Science, Artificial Intelligence, and Electrical & Electronic Engineering that you can apply for. You will also be eligible for advanced placements in computer-related degree programmes of universities in Australia, New Zealand and United Kingdom.

1ST YEAR

Common First-Year Modules (Domain, Math, and Common Core)

2ND YEAR

DCPE Core Modules + Electives

Industry Certification Prep Track (Choose 1 Track)

Software Engineering	Enterprise Networking

3RD YEAR

DCPE 3rd Year Specialisations (Choose 1 Specialisation)

AI Infrastructure & Cloud	IoT & Intelligent Systems	Computer Science	Cyber Security

+ 22-week Internship & Electives

ENTRY REQUIREMENTS

Range of Net 2026 JAE ELR2B2: 7 – 20
Aggregate Type: ELR2B2-C

SUBJECT	GRADE
English Language	1 – 7
Mathematics (Elementary/Additional)	1 – 6
Any one of the following subjects: • Biology • Biotechnology • Chemistry • Computing/Computer Studies • Design & Technology • Electronics/Fundamentals of Electronics • Physics • Science (Chemistry, Biology) • Science (Physics, Biology) • Science (Physics, Chemistry)	1 – 6

Applicants should not be suffering from severe vision deficiency, acute hearing impairment or uncontrolled epilepsy. Interested applicants with any of these conditions are advised to contact Singapore Polytechnic for more information.

I completed my research internship locally at A*STAR, Institute for Infocomm Research (I2R). During my time there, I worked in the Machine Intellection department, where I focused on generating synthetic semiconductor data. This experience provided me with the opportunity to author a conference paper, explore cutting-edge applied engineering research, and tackle complex computational challenges.

My journey at Singapore Polytechnic extended far beyond academics. Through leading various grassroots & overseas projects and participating in diverse competitions, I gained invaluable perspectives on community development and cross-cultural collaboration. These holistic experiences, paired with rigorous technical training, have motivated me to use engineering to improve lives in practical, lasting ways.

Dennis Teo Guan Bin

DCPE Gold Medallist
Lee Kuan Yew Award Recipient
Cisco Systems Gold Medallist
OCBC Prize Recipient
SP Engineering Scholar
A*STAR Science Award Recipient
Renaissance Engineering Programme Scholar (NTU)

WHAT YOU'LL STUDY

Diploma in Computer Engineering

FIRST YEAR

- Basic Mathematics
- Common Core Modules
- Computer-Aided Design & Drafting
- Digital Electronics 1
- Digital Electronics 2
- Engineering Mathematics I
- Education & Career Guidance 1
- Introduction to Engineering & Design
- Introduction to Engineering Programming
- Network Fundamentals
- Principles of Electrical & Electronic Engineering I
- Principles of Electrical & Electronic Engineering II

SECOND YEAR

- Cloud Foundations
- Common Core Modules
- Elective 1
- Elective 2
- Engineering Mathematics II
- Fundamentals of GPU & AI Infrastructure
- ML & AI with Python
- Microcontroller Applications
- Statistics & Analytics for Engineers

In Year 2, students can align their studies with their targeted industry certifications by choosing from the following prep tracks:

+ Computer Engineering
- DevOps for AIoT
- Full Stack Development

+ Enterprise Networking
- Computer Networking
- LAN Switching & Wireless

THIRD YEAR

- Common Core Modules
- Elective 3
- Elective 4 (Option)
- Elective 5 (Option)
- Year-3 Specialisation Modules 1 to 4
- 22-Week Internship Programme/ Internship Equivalent

In Year 3, students can choose one specialisation from the following:

+ AI Infrastructure & Cloud
- AI Compute Infrastructure Engineering
- AI Infrastructure Operations
- Cloud Architecting
- Cloud Native Application Development

+ IoT & Intelligent Systems
- Edge Computing
- Embedded Computer Systems
- Smart Systems Architecture
- 5G & AIoT Applications

+ Computer Science
- Computer Architecture
- Data Structures & Algorithms
- Deep Learning & Neural Networks
- Quantum Computing

+ Cyber Security
- AI for Cybersecurity
- Cyber Security Operations
- Firewall Technologies
- Network Analysis & Forensics

Electrical & Electronic Engineering

DEEE — S99

The Power to Fuel the Future

Dive into a diverse range of engineering subjects with the Diploma in Electrical & Electronic Engineering (DEEE) and develop versatile, industry-ready skillsets. With a prestigious history of close to 70 years and more than 20,000 successful graduates, we have a proven track record of producing successful engineers that are highly sought-after in the field.

WHAT YOU CAN EXPECT

- Choose one of **seven specialisations** in:
  - Biomedical
  - IoT & Communication
  - Microelectronics
  - Power
  - Rapid Transit Technology
  - Robotics Intelligence
  - Sustainable Energy
- Join the University Accelerated Pathway Programme (UAPP) with NUS, NTU, SUTD, or SIT to get a head start in university life.
- Pursue your passion through electives that can lead to a Minor or Certificate, such as Minor in 5G & Artificial Intelligence of Things (AIoT), and Certificate in Robotics and Automation.
- Experience an augmented learning environment in rail engineering with our latest integrated Rail System Simulator, a first among the polytechnics.
- Gain exposure through Overseas Immersion Programmes in various countries, such as Japan, Malaysia, and China.
- Immerse in a 22-week internship with opportunities at reputable companies such as SP Group, SMRT, A*STAR, GlobalFoundries, Siemens, ST Electronics and CleanTech Solar.

SCHOLARSHIPS

- A*STAR Science Award
- DSTA Polytechnic Digital/Engineering Scholarship
- Energy Industry Scholarship
- Home Team Diploma Sponsorship
- iBuildSG Diploma Scholarship
- Micron Scholarship
- PUB Engineering Scholarship
- SAF Polytechnic Sponsorship
- SG-Rail Scholarship
- SP Engineering Scholarship

CAREER OPTIONS

- Assistant Electrical/Electronics Engineer
- Assistant Quality/Process/Project/ Test Engineer
- Assistant Facilities Management Engineer
- Assistant Field Service Engineer
- Assistant Instrumentation Engineer
- Assistant Maintenance Engineer
- Biomedical Equipment Service Engineer
- Solar (PV) Technologist

FURTHER STUDIES

• At NTU, you may get up to one year of exemption for engineering-related courses.

• At NUS, you may receive advanced placement credits (APCs) in relevant modules for up to 38 units (equivalent to a year's worth of study).

• You can gain an advanced standing of up to two years in overseas universities, such as University of New South Wales (Australia), Imperial College London (UK), and University of Auckland (New Zealand).

Diploma in Electrical & Electronic Engineering

1ST YEAR

2ND YEAR

DEEE Core Modules + Electives

3RD YEAR

DEEE 3rd Year Specialisations (Choose 1 specialisation)

Biomedical	IoT & Communication	Microelectronics	Power
Rapid Transit Technology	Robotics Intelligence	Sustainable Energy	

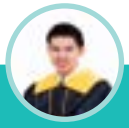

+ 22-Week Internship & Electives

ENTRY REQUIREMENTS

Range of Net 2026 JAE ELR2B2: 5 – 15
Aggregate Type: ELR2B2-C

SUBJECT	GRADE
English Language	1 – 7
Mathematics (Elementary/Additional)	1 – 6
Any one of the following subjects: • Biology • Biotechnology • Chemistry • Computing/Computer Studies • Design & Technology • Electronics/Fundamentals of Electronics • Physics • Science (Chemistry, Biology) • Science (Physics, Biology) • Science (Physics, Chemistry)	1 – 6

Applicants who have colour vision deficiency, and wish to pursue a career in electrical power engineering or as a Licensed Electrical Worker (LEW), may encounter difficulties meeting the course requirements and expectations. This condition is required by the Energy Market Authority (EMA) of Singapore. In addition, applicants should not be suffering from severe vision deficiency, acute hearing impairment or uncontrolled epilepsy. Interested applicants with any of these conditions are advised to contact Singapore Polytechnic for more information.

DEEE at SP helped me discover my passion for microelectronics through hands-on lessons, cleanroom experiences, and engineering projects. My leadership roles in the EEE Student Ambassadors and EEE Club EXCO developed my confidence, teamwork, and communication skills.

A highlight of the course was my 37-week internship at A*STAR's Institute of Microelectronics. It allowed me to apply what I learned in a real research environment and gain valuable industry exposure.

I am now pursuing Electrical and Electronic Engineering at NTU, with the goal of contributing to the future of semiconductor technology.

Jay Liew Sin Jie

- Elective 3
- Elective 4 (Option)
- Elective 5 (Option)
- Year-3 Specialisation Modules 1 to 4
- 22-Week Internship Programme/Internship Equivalent

In Year 3, students have the opportunity to specialise in the area of their particular interest. They can choose from the following specialisations:

+ Biomedical
- Anatomy & Physiology
- AI and Data Analytics in Healthcare
- Biomedical Equipment & Practices
- Biomedical Instrumentation Design & Applications

+ Microelectronics
- IC Design
- IC Testing
- Quality & Reliability
- Wafer Fabrication Technology

+ Sustainable Energy
- Electric Vehicle Technology
- Hydrogren, Fuel Cell Technology & Energy Storage

+ Rapid Transit Technology
- Principles of Communication
- Rapid Transit Signalling System
- Rapid Transit System
- Smart Sensors & Actuators

+ IoT & Communication
- Industrial Internet of Things
- Principles of Communication
- Wireless Technology Applications
- 5G & AIoT Applications

- Photovoltaic System Design
- Smart Grid & Building Energy Management

+ Power
- Power Electronics & Drives
- Power System Analysis
- Power Transmission & Distribution
- Smart Grid & Energy Storage

+ Robotics Intelligence
- Artificial Intelligence in Robotics
- Dynamics & Control
- Robotics Technology
- Smart Sensors & Actuators

Engineering With Business

DEB — S42

Synergising Engineering Innovations with Business Solutions

Are you looking to fuel your passion for engineering and technology while honing your business acumen? The Diploma in Engineering with Business (DEB) is your ticket to the best of both worlds, by combining engineering principles with essential business knowledge.

Acquire skills in engineering design, programming and electrical and electronic engineering while mastering the art of marketing cutting-edge technological solutions. You'll also learn about artificial intelligence, develop mobile applications and be fluent in data to be well-equipped to navigate the digital revolution. Explore further in the areas that ignite your curiosity through a selection of electives and earn certificates or minors along the way.

FURTHER STUDIES

You have the flexibility to further your studies in engineering, business or similar interdisciplinary programmes in both local and overseas universities. You can earn advanced standing of up to two years when you take up engineering or business degree programmes.

At **NTU**, you may get up to one year of exemption for engineering-related courses.

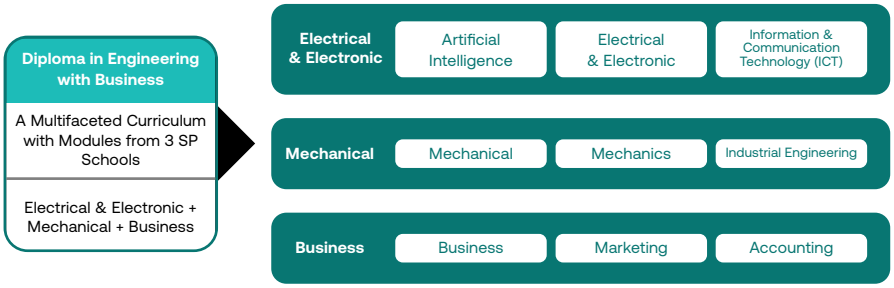

At **NUS**, you may receive advanced placement credits (APCs) in relevant modules for up to a maximum of 38 modular credits (equivalent to a year's worth of study).

CAREER OPTIONS

- Assistant Engineer (Product Design/Development)
- Assistant Engineer (Project)
- Business Development Executive
- Customer Relationship Management Executive
- Technopreneur
- Procurement Executive
- Sales and Marketing Executive

WHAT YOU CAN EXPECT

- Gain multi-faceted perspectives with **modules from three SP schools**: Electrical & Electronic Engineering, Mechanical and Aeronautical Engineering, and Business.
- Immerse in diverse cultures through enriching and exciting **overseas technopreneurship immersion programmes** in Japan or China.
- Gain exposure through an exciting two-week overseas exchange programme Learning Express, where you will use your skills and knowledge to improve lives in the real world.
- Delve into your interests through electives that can lead to a **certificate or minor**:
  - + Digitalisation (e.g. Minor in 5G & AIoT, Minor in Data & Artificial Intelligence)
  - + Sustainability (e.g. Minor in Green Energy)
  - + Innovation & Entrepreneurship (e.g. Minor in Entrepreneurship)
  - + Internationalisation
- Immerse in a 22-week internship with opportunities at reputable companies such as OCBC, Mapletree, ST Electronics, Panasonic, SSMC and A*STAR.
- Join the **SP-NUS** University Accelerated Pathway Programme (UAPP) or **SP-SUTD** University Accelerated Pathway Programme to get a head start in university life.

ENTRY REQUIREMENTS

Range of Net 2026 JAE ELR2B2: 6 – 12
Aggregate Type: ELR2B2-C

SUBJECT	GRADE
English Language	1 – 7
Mathematics (Elementary/Additional)	1 – 6
Any one of the following subjects:	1 – 6

- Biology
- Biotechnology
- Chemistry
- Computing/Computer Studies
- Design & Technology
- Electronics/Fundamentals of Electronics
- Physics
- Science (Chemistry, Biology)
- Science (Physics, Biology)
- Science (Physics, Chemistry)

Applicants should not be suffering from severe vision deficiency, acute hearing impairment or uncontrolled epilepsy. Interested applicants with any of these conditions are advised to contact Singapore Polytechnic for more information.

- SP Engineering Scholarship

During my time in SP's DEB programme, I developed Stick 'Em from Year 1, creating prototypes while gaining access to mentors and exploring both engineering and startups. The multidisciplinary foundation allowed me to transform my childhood passion for tinkering with air cannons and flamethrowers into a meaningful venture.

As founder and CEO of Stick 'Em, I've made STEAM education more accessible through innovative chopstick robots, reaching over 12,000 students and 1,200 teachers across 95 schools in 11 countries since launching in 2020. My latest achievements include being recognised as one of the youngest nominees on Forbes 30 Under 30 Asia 2025 and global winner of the US$1 million Hult Prize 2025.

- Engineering Materials
- Fundamentals of Economics
- Introduction to Engineering & Design
- Introduction to Engineering Programming
- Principles of Marketing
- Principles of Electrical & Electronic Engineering I
- Thermofluids I

SECOND YEAR

- Common Core Modules
- Consumer Psychology
- Elective 1
- Elective 2
- Engineering Mathematics II
- Introduction to Digital Marketing
- Mobile Applications Development
- Microcontroller Applications
- Principles of Electrical & Electronic Engineering II
- Technology to Business
- Mechanics I
- Statistics & Analytics for Engineers

THIRD YEAR

- Accounting
- Artifical Intelligence in Engineering Business Analytics
- Circuit Theory & Analysis
- Common Core Modules
- Elective 3
- Elective 4 (Option)
- Elective 5 (Option)
- Industrial Engineering
- 22-Week Internship Programme /Internship Equivalent

ELECTIVES

The SP elective framework offers students options to pursue their passion and / or meet different career needs, and is an integral part of the holistic education we seek to provide to our students. The learning experiences of this elective framework help students in their development as self-directed, versatile, life-long learners, which are essential in today's volatile and changing societal as well as occupational landscape.

Most students will take three electives during their time in SP. Students who are interested to explore additional new skills and abilities will have the opportunity to take up to five electives. Certificates and minors will be awarded when students complete a suite of related elective modules.

COMMON CORE CURRICULUM

The Common Core Curriculum (CCC) prepares you for a future shaped by AI, rapid change, and real-world challenges. Across seven modules, you will build AI and digital skills, while developing critical human skills such as teamwork, critical thinking, creativity, and communication. These skills will help you stand out at the workplace and in life.

You will also engage with challenges that matter to Singapore, ASEAN, and the world through the Sustainable Development Goals (SDGs), gain a deeper understanding of how they affect different communities, and discover how you can contribute to a more sustainable future.

All full-time diploma students are required to take a compulsory Education and Career Guidance module in SP. Students will take Education and Career Guidance — Personal Development (30 hours) in their first year.

All students are required to take the compulsory Wellness for Life (WFL) module during their first year at SP. Students must pass the module as part of the graduation criteria.

Mechanical Engineering

DME — S91

Empower your future with the most broad-based Engineering Course that remains Evergreen, always relevant, and consistently in demand across ALL sectors

Gear up for an exhilarating journey with the Diploma in Mechanical Engineering (DME) at SP! Since its inception in 1958, the DME has been the go-to choice for aspiring engineers like you.

Elevate your journey in Mechanical Engineering with our curriculum, seamlessly integrating AI advancements and sustainability principles. Beyond mastering the fundamentals, our program aligns with global trends, providing a robust foundation in mechanical engineering complemented by essential interdisciplinary skills in Business and Humanities.

We champion a hands-on learning approach, immersing you in industry-focused opportunities that not only enhance your knowledge and competencies but also instill a strong sense of responsibility towards sustainability. Experience the transformative power of advancement of technology in shaping a better future through our partnerships with renowned organisations such as:

- **A*STAR**
- **Dassault Systèmes**
- **Panasonic**
- **SBS Transit**
- **Siemens**
- **Sivantos**
- **SMRT**

These industry partners provide opportunities for our students to build a network of connections while working on ground-breaking projects — opening doors to unparalleled career opportunities!

FURTHER STUDIES

You can receive advanced standing of up to two years in degree programs related to Mechanical, Mechatronics, Robotics Systems, Electrical & Electronics, Computer Science, or Computer Engineering at both local and international universities.

These universities include, but are not limited to:

- Nanyang Technological University (NTU)
- National University of Singapore (NUS)
- Singapore University of Technology & Design (SUTD)
- Singapore Institute of Technology (SIT)
- Singapore University of Social Sciences (SUSS)
- Royal Melbourne Institute of Technology University

WHAT YOU CAN EXPECT

- Gain practical industry experience that will prepare you to be future-ready.
- Be exposed to the latest advanced manufacturing technologies at our high-tech learning space.
- Check out the multiple pathways to established local and overseas universities.
- Choose from diverse career options available in emerging fields such as advanced manufacturing, automation, biomedical, composites, energy, materials, product design, robotics and more.
- **Choose 1 of 4 specialisations* in:**
  - Biomedical
  - Energy & Sustainability
  - Rapid Transit Technology
  - Smart Manufacturing & Robotics

  **All specialisations incorporate elements of design and simulation.*

CAREER OPTIONS

- *Army Engineer (under the SAF Polytechnic Sponsorship Pathway Programme specifically designed for mechanical engineering students) Assistant Automation Engineer*
- *Assistant Engineering Services Engineer*
- *Assistant Facility Engineer*
- *Assistant HVAC (Heating, Ventilation & Air-Conditioning) Engineer*
- *Assistant Machine & Product Design Engineer*
- *Assistant Mechanical Engineer*
- *Assistant Medical Device/Equipment Application Engineer*
- *Assistant Medical Device Design Engineer*
- *Assistant Project Engineer*
- *Assistant Quality Control/ Assurance Engineer*
- *Assistant Engineer (Rolling Stock)*
- *Assistant Engineer (Track Infrastructure)*
- *Assistant R&D (Research & Development) Engineer*
- *Assistant Tooling Engineer*
- *Bioengineering Technologist*
- *Medical Equipment Technologist*
- *Regulatory Affairs Specialist*

ENTRY REQUIREMENTS

Range of Net 2026 JAE ELR2B2: 5 – 15
Aggregate Type: ELR2B2-C

SUBJECT	GRADE
English Language	1 – 7
Mathematics (Elementary/Additional)	1 – 6
Any one of the following subjects: • Biology • Biotechnology • Chemistry • Computing/Computer Studies • Design & Technology • Electronics/Fundamentals of Electronics • Physics • Science (Chemistry, Biology) • Science (Physics, Biology) • Science (Physics, Chemistry)	1 – 6

Applicants should not be suffering from severe vision deficiency, acute hearing impairment or uncontrolled epilepsy. Interested applicants with any of these conditions are advised to contact Singapore Polytechnic for more information.

SCHOLARSHIPS

- A*STAR Science Award
- Built Environment Scholarship
- DSTA Polytechnic Scholarship
- Energy-Industry Scholarship
- Home Team Diploma Sponsorship
- NEA-Industry Scholarship
- PUB Engineering Diploma Scholarship
- SAF Polytechnic Sponsorship
- SP Engineering Scholarship

DME provided me with a strong foundation in engineering knowledge and practical experience. Through designing and building an automated smart clothes-drying rack, as well as participating in an overseas industrial learning programme at a hospital in China, I developed valuable technical skills and gained broader insights into the impact of engineering solutions on everyday life. These experiences inspired me to pursue innovative approaches to addressing real-world challenges.

Phoebe Lee
DME Gold Medallist
Chua Chor Teck Gold Medal
IES Gold Medal

WHAT YOU'LL STUDY

Diploma in Mechanical Engineering

FIRST YEAR

- Basic Mathematics
- Computer Aided Drafting
- Common Core Modules
- Computer Programming
- Digital Electronics Fundamentals
- Engineering Materials 1
- Engineering Mathematics 1
- Fundamentals of Electrical & Electronic Engineering
- Introduction to Engineering
- Mechanics 1
- Thermofluids 1

SECOND YEAR

- Computer-Aided Machining
- Common Core Modules
- Design & Implement
- Engineering Materials 2
- Engineering Mathematics 2
- Elective 1
- Elective 2
- Industrial Automation
- Mechanics 2
- Statistics & Analytics for Engineers
- Thermofluids 2
- Workplace Safety & Health Management

Starting Year 2, students will specialise in 1 of the 4 listed specialisations.

+ Specialisation Modules

+ Biomedical
- Fundamentals of Anatomy & Physiology

+ Energy & Sustainability
- Building Information Modelling for MEP Services

+ Rapid Transit Technology
- Principles of Railway Engineering

+ Smart Manufacturing & Robotics
- Smart Factory Connectivity & Integration

THIRD YEAR

- Elective 3
- Engineering Thermodynamics
- Fluid Mechanics
- Project Internship
- Mechanics 3

In Year 3, students will continue with the specialisation chosen in Year 2.

+ Specialisation Modules

+ Biomedical
- Ai Vision & Robotics
- Assistive Technology & Rehabilitation Engineering

+ Energy & Sustainability
- Design for Sustainability
- Refrigeration & Air-conditioning

+ Rapid Transit Technology
- Rolling Stock Design & Maintenance
- Railway Infrastructures Design & Maintenance

+ Smart Manufacturing & Robotics
- AI Vision & Robotics
- Smart Tooling for Manufacturing

ELECTIVES

The SP elective framework offers students options to pursue their passion and / or meet different career needs, and is an integral part of the holistic education we seek to provide to our students. The learning experiences of this elective framework help students in their development as self-directed, versatile, life-long learners, which are essential in today's volatile and changing societal as well as occupational landscape.

Most students will take three electives during their time in SP. Students who are interested to explore additional new skills and abilities will have the opportunity to take up to five electives. Certificates and minors will be awarded when students complete a suite of related elective modules.

All full-time diploma students are required to take a compulsory Education and Career Guidance module in SP. Students will take Education and Career Guidance — Personal Development (30 hours) in their first year.

All students are required to take the compulsory Wellness for Life (WFL) module during their first year at SP. Students must pass the module as part of the graduation criteria.

Mechatronics & Robotics

DMRO — S73

Blending Mechanical, Electronics and Programming, Robotising the Future

Dive into the realm of cutting-edge intelligent systems that can move, interact, and even think independently.

At DMRO, we believe in inspiring minds, igniting passion, and innovating solutions. Our teaching methods emphasise active and collaborative learning experiences, incorporating the Conceive-Design-ImplementOperate (CDIO) framework that combines engineering fundamentals with real-world systems and products. Moreover, our curriculum infuses intrinsic motivation methods to inspire you to build skills that will take you further in life.

If you're captivated by engineering, electronics, and programming, join DMRO and discover a world of technological possibilities.

WHAT YOU CAN EXPECT

- Gain practical industry experience that will prepare you to be future-ready.
- Hone your engineering skills at the dedicated DMRO Learning Space.
- Discover your intrinsic motivation and unlock your potential.
- Check out the multiple pathways to established local and overseas universities.
- Choose from diverse career options in emerging fields such as robotics, automation, and advanced manufacturing.

FURTHER STUDIES

You can receive advanced standing of up to two years in degree programs related to Mechanical, Mechatronics, Robotics Systems, Electrical & Electronics, Computer Science, or Computer Engineering at both local and international universities.

- Royal Melbourne Institute of Technology University

CAREER OPTIONS

- Assistant Automation Engineer
- Assistant Design Engineer
- Assistant Electromechanical Engineer
- Assistant Maintenance Engineer
- Assistant Mechanical Engineer
- Assistant Mechatronics Engineer
- Assistant Project Engineer
- Assistant Quality Control Engineer
- Assistant Research & Development Engineer
- Assistant Robotics Engineer
- Assistant System Development Engineer
- Industrial Robotics Programmer
- Sales Engineer

ENTRY REQUIREMENTS

Range of Net 2026 JAE ELR2B2: 5 – 13
Aggregate Type: ELR2B2-C

SUBJECT	GRADE
English Language	1 – 7
Mathematics (Elementary/Additional)	1 – 6
Any one of the following subjects: • Biology • Biotechnology • Chemistry • Computing/Computer Studies • Design & Technology • Electronics/Fundamentals of Electronics • Physics • Science (Chemistry, Biology) • Science (Physics, Biology) • Science (Physics, Chemistry)	1 – 6

Applicants should not be suffering from severe vision deficiency, acute hearing impairment or uncontrolled epilepsy. Interested applicants with any of these conditions are advised to contact Singapore Polytechnic for more information.

During my internship at a local SME company called Pocket Technology Pte. Ltd., I primarily collaborated with my supervisor on tasks such as designing components using 3D software, assembling these components, and operating a variety of equipment. While I was able to apply the knowledge I had gained in school, the internship also exposed me to the realization that there is a wealth of additional essential knowledge and skills specific to the job that I had yet to acquire. This experience was a valuable opportunity for me to learn and grow in my field.

Chanakyan Kannan
DMRO Gold Medallist

Common Engineering Programme DCEP — S40

Build a Strong Foundation in Engineering, Discover your Strengths

Are you fascinated by engineering but unsure which discipline to specialise in? The Common Engineering Programme (DCEP) curriculum opens doors to an extraordinary blend of subjects, introducing you to various disciplines in the field.

In the first semester, you will be introduced to a wide range of engineering modules, where you get to dabble with mechanical equipment, electrical circuits and electronic gadgets. Through immersive experiences, you'll have the chance to discover your interests and strengths, paving the way for a future in engineering that resonates with you.

At the end of your first semester, you'll be able to make an informed decision to pursue one of seven engineering diplomas offered by SP:

S88 Aeronautical Engineering[1]
S90 Aerospace Electronics[1]
S53 Computer Engineering[2]
S99 Electrical & Electronic Engineering[3]
S42 Engineering with Business[2]
S91 Mechanical Engineering[2]
S73 Mechatronics & Robotics[2]

1st Year, 1st Semester (Common)

Towards the end of 1st Semester, 1st Year **(Select 1 out of 7 courses)***

MAE			EEE			
DARE S88	DME S91	DMRO S73	DASE S90	DCPE S53	DEB S42	DEEE S99

2nd / 3rd Year (Proceed and continue with allocated course)

* Course allocation of students are based on their first semester cGPA (with a focus on associated school/course modules), course choices and vacancies in courses.

WHAT YOU CAN EXPECT

- Discover a wide range of engineering disciplines.
- Get an overview of the skills, competencies, and equipment pertinent to various technologies.
- Ascertain your strengths and interests through exposure to various engineering disciplines, leading to a more informed career choice.

FURTHER STUDIES

Depending on your diploma course, you can pursue an engineering degree at a local or international university.

ENTRY REQUIREMENTS

Range of Net 2026 JAE ELR2B2: 3 – 19
Aggregate Type: ELR2B2-C

SUBJECT	GRADE
English Language	1 – 7
Mathematics (Elementary/Additional)	1 – 6
Any one of the following subjects: • Biology • Biotechnology • Chemistry • Computing/Computer Studies • Design & Technology • Electronics/Fundamentals of Electronics • Physics • Science (Chemistry, Biology) • Science (Physics, Biology) • Science (Physics, Chemistry)	1 – 6

Note:

[1] Applicants should not be suffering from severe vision deficiency (including colour vision), acute hearing impairment or uncontrolled epilepsy. Interested applicants with any of these conditions are advised to contact Singapore Polytechnic for more information.

[2] Applicants should not be suffering from severe vision deficiency, acute hearing impairment or uncontrolled epilepsy. Interested applicants with any of these conditions are advised to contact Singapore Polytechnic for more information.

[3] Applicants who have colour vision deficiency, and wish to pursue a career in electrical power engineering or as a Licensed Electrical Worker (LEW), may encounter difficulties meeting the course requirements and expectations. This condition is required by the Energy Market Authority (EMA) of Singapore. In addition, applicants should not be suffering from severe vision deficiency, acute hearing impairment or uncontrolled epilepsy. Interested applicants with any of these conditions are advised to contact Singapore Polytechnic for more information.

> I had the opportunity to explore electrical and mechanical engineering modules within the DCEP, which played a crucial role in guiding my decision on the engineering specialisation for my diploma.
>
> **Teo Zhe Kai**
> Common Engineering Programme Alumnus

WHAT YOU'LL STUDY

Common Engineering Programme

is a full-time first semester programme and you will progress to one of the seven full-time engineering courses.

FIRST YEAR

+ Semester 1

- Basic Mathematics
- Common Core Modules
- Computer Aided Drafting
- Digital Electronics 1
- Engineering Materials 1
- Introduction to Engineering Programming
- Principles of Electrical & Electronic Engineering 1

+ Semester 2

+ For DARE/DME/DMRO Option

- Common Core Modules
- Engineering Mathematics 1
- Introduction to Engineering
- Mechanics 1
- Thermofluids 1

+ For DASE/DCPE/DEEE Option

- Common Core Modules
- Digital Electronics 2
- Engineering Mathematics 1
- Introduction to Engineering & Design
- Principles of Electrical & Electronic Engineering 2

+ For DEB Option

- Common Core Modules
- Engineering Mathematics 1
- Fundamentals of Economics
- Introduction to Engineering & Design
- Principles of Marketing
- Thermofluids 1

SECOND YEAR / THIRD YEAR

Students will take the modules of the engineering course that they have been posted to in the first year, as well as common core modules.

ELECTIVES

The SP elective framework offers students options to pursue their passion and / or meet different career needs, and is an integral part of the holistic education we seek to provide to our students. The learning experiences of this elective framework help students in their development as self-directed, versatile, life-long learners, which are essential in today's volatile and changing societal as well as occupational landscape.

Most students will take three electives during their time in SP. Students who are interested to explore additional new skills and abilities will have the opportunity to take up to five electives. Certificates and minors will be awarded when students complete a suite of related elective modules.

COMMON CORE CURRICULUM

The Common Core Curriculum (CCC) prepares you for a future shaped by AI, rapid change, and real-world challenges. Across seven modules, you will build AI and digital skills, while developing critical human skills such as teamwork, critical thinking, creativity, and communication. These skills will help you stand out at the workplace and in life.

You will also engage with challenges that matter to Singapore, ASEAN, and the world through the Sustainable Development Goals (SDGs), gain a deeper understanding of how they affect different communities, and discover how you can contribute to a more sustainable future.

All full-time diploma students are required to take a compulsory Education and Career Guidance module in SP. Students will take Education and Career Guidance — Personal Development (30 hours) in their first year.

All students are required to take the compulsory Wellness for Life (WFL) module during their first year at SP. Students must pass the module as part of the graduation criteria.

Why SP?

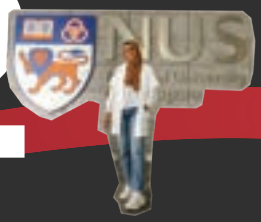

1

A TRAILBLAZER IN EDUCATION FOR ALL AGES

We are Singapore's first polytechnic established in 1954, with a rich history spanning seven decades. At the forefront of pedagogical innovation, SP is renowned as the regional leader in the CDIO movement.

2

FAST-TRACK YOUR DEGREE: SAVE UP TO 2 YEARS

We recognise your unique aspirations! Fast-track to top universities like NUS, NTU, SMU, or SUTD with credit exemptions or advanced standing — up to 2 years! Accelerate your journey with university modules, all while studying at SP.

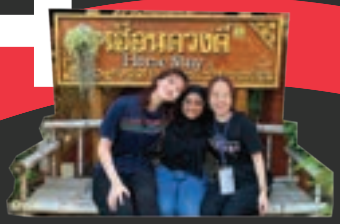

3

CONNECT WITH INDUSTRY LEADERS AND SINGAPORE'S LARGEST POLY ALUMNI NETWORK

At SP, industry engagement is key. Build real-world connections through client-paid projects with leading companies. Join our alumni network of over 240,000 professionals, CEOs, and experts — your gateway to career success.

4

GLOBAL EXPOSURE TO BROADEN YOUR HORIZONS

Embark on overseas internships and immersion programmes in ASEAN, China, India, Australia, and beyond! Gain global experience, immerse in diverse cultures, and sharpen your skills with international exposure.

5

CUSTOMISATION OF YOUR LEARNING EXPERIENCE: OVER 100 ELECTIVE MODULES

Choose your path! SP is the first to offer a fully customised elective programme with over 100 options. Deepen your expertise, fuel your passions, and earn additional certificates and minors for a brighter academic and career future.

6

CONVENIENCE AND ACCESSIBILITY LIKE NO OTHER!

Rain or shine, getting to SP is easy! Connected directly to Dover MRT, we're the only polytechnic with this convenience. Plus, nearby dining, shopping, and entertainment make campus life even more exciting!

7

DIVERSE CCAS TO CULTIVATE YOUR INTERESTS

SP's wide range of CCAs lets you showcase your talents, explore new interests, and connect with peers. Whether locally or overseas, our CCAs support your holistic growth and development beyond the classroom.

8

SCHOLARSHIP OPPORTUNITIES FOR STUDENTS

SP is committed to supporting deserving students with a range of scholarships, ensuring you have the opportunities and resources needed to achieve academic excellence.

9

OPPORTUNITIES FOR THE LEADER IN YOU

SP shapes future leaders with programmes like EDGE and SPOT, empowering students to rise beyond their diplomas and become tomorrow's trailblazers.
